Recommend trialing earplugs for Robert every night in order to decrease noise while providing care to Robert's roommate. He is aware and agreed. Please provide reminders to use it. 2. Knock and introduce yourself. Ensure you are approaching him with a friendly and slow-paced introduction. Robert enjoys a sense of humor. If two people are assisting Robert for care, ensure that only one person speaks to avoid overwhelming him. 3. Build rapport. Start conversation about Robert's interest and hobbies from the personhood summary. (He loves his grandchildren, loves to build birdhouses, doll houses and benches, likes playing cards Ex. Poker). 4. Approach with choices that has favourable outcomes to allow Robert to make his own decisions. (Ex. "Would you like a shower now before breakfast or after?", "Do you want to use the washroom before or after breakfast?"). Keep Robert independent during care as much as possible while also considering his safety and functional abilities. 5. If Robert seems agitated, avoid the word "No" and do not argue, it will only escalate the situations. Utilize a stop and go approach. 6. Loud environments may escalate expressions. Staff may speak to Vern mirroring the same language he is using with them. Using explicative when necessary when chatting with him, if comfortable to do so. 2. Ensure using 2 staff for all personal care to ensure staff safety. 3. Assign male care when available. 4. Before providing care, introduce yourself and state what you are there to do. 5. Use STOP and GO approach when necessary. Re-approaching in 10-15 min. 6. If Vernon is sexually expressive, continue with ongoing health teaching always using "Mr. Nantais, I am here to provide care" saying "This is not appropriate". 7. Avoid using statements that could be provoking sexual conversation such as "What do you want to do?", "Do you want anything?", "What can I do for you?".

If Bernhard exhibits verbal expressions do not take them personal, keep calm, remain warm, supportive and respectful. Do not argue as this will just aggravate the behaviours. 2. When providing care use compliments and positive praise to build a positive relationship. Use distraction techniques using "PERSONHOOD" information as a tool (he ran marathons, went scuba diving and skydiving. Bernhard was fitness conscious). 3. Recommend to speak in short simple sentences and consider allowing Bernhard to process information. 4. Validate Bernhard feelings. Keep Bernhard's urinal up on top of the wardrobe. Bernhard has agreed to call for assistance when he needs to use it or offer when approaching for toileting. Assist Bernhard with emptying it when he is finished and return it to top of wardrobe. 5. Be mindful when Bernhard is leaving the dining room from having his meals that his path is clear of other residents as to avoid altercations with other residents. 6. Continue to respond to call bell requests to reduce escalation of behaviours. Notes indicate nursing intervention, responding and validating Bernhard's concerns have reduced yelling and screaming. 7. Report all expressions to team leader. <p>Date Initiated: 07/12/2023 Created on: 06/06/2023 Created by: Amrit Dhaliwal (RPN) Revision on: 08/05/2024 Revision by: Ksenia Tchipilko (RPN)</p>	PCA Registered Practical Nurse
