Utilize two staff members for all care. One to distract and one to provide care. 2. Keep Bara's hands occupied - Provide Bara with rolled hand towels during care to prevent incidents of grabbing and pinching. 3. When Bara refuses care, use a STOP and GO approach, reapproaching in 15-30 minutes later. 4. Use nonverbal communication - Incorporate gestures, facial expressions and calm tone of voice to enhance understanding and reduce frustration during care. 5. Due to language barrier friendly body language and hand gestures can help to assist in successfully providing care to Bara. 6. Report all expressive behaviours to team leader. <p>Date Initiated: 04/30/2025 Created on: 04/30/2025 Created by: Ksenia Tchpilko (RPN) Revision on: 04/30/2025 Revision by: Ksenia Tchpilko (RPN)</p>	PCA

Allow Jo-Anne space and time when exhibiting signs of distress or agitation. 2. Use STOP and GO approach. Re-approach later when Jo-Anne appears calmer. 3. Use calm, non-threatening tone and approach . Offer choices when possible to promote sense of control (e.g., "Would you like to wash up now or in 15 mins). 4. Encourage Jo-Anne to complete ADLs with cueing and supervision before providing immediate assistance. Maintaining her independence may help Jo-Anne feel less angry and reduce responsive behaviours during personal care. 	PCA Registered Practical Nurse
