<p>• Potential for Expressive Behaviour of verbally aggression related to depression, anxiety, schizophrenia as evidence by ongoing verbally responsive toward staff.</p> <p>Date Initiated: 05/18/2022 Created on: 05/18/2022 Created by: Courtney Nantais (Registered Practical Nurse) Revision on: 12/08/2025 Revision by: Chrissy Bowden (Social Worker)</p>		<p>Date Initiated: 12/14/2025 Created on: 12/14/2025 Created by: Ksenia Tchpilko (RPN) Revision on: 12/14/2025 Revision by: Ksenia Tchpilko (RPN)</p> <p>• BSO RECOMMENDATIONS:</p> <p>1. Guy often refuses care and medications, consider giving him choices of when to take medications and when to receive care. Ex: "Would you like to take your medication now or in 15 minutes?" Giving him a choice may make him more likely to comply. Document effectiveness.</p> <p>2. If Guy is resistant to care, give him some choice in how he would like to receive the care. If he remains resistant, utilize STOP and GO approach, leaving and re-attempt care in 15-20 minutes later.</p> <p>3. Report all expressive behaviours to team leader.</p> <p>Date Initiated: 11/24/2022 Created on: 11/24/2022 Created by: Amrit Dhaliwal (RPN) Revision on: 12/14/2025 Revision by: Ksenia Tchpilko (RPN)</p>	Nurse

## Care Plan Report

Focus	Goal	Interventions/Tasks	Position	Freq/Resolved	
<p>• Potential for EXPRESSIVE BEHAVIOUR of PHYSICAL and RESISTANCE to care need nature related to Medical Diagnosis of Bipolar disorder, Dementia, Depression and REM sleep disorder.</p> <p>Incident on June 22, 2025.  Date Initiated: 12/06/2024  Created on: 12/06/2024  Created by: Ksenia Tchipilko (RPN)  Revision on: 12/27/2025  Revision by: Ksenia Tchipilko (RPN)</p>		<p>Revision on: 12/06/2024  Revision by: Ksenia Tchipilko (RPN)</p> <p>• MEDICATION: Administer medication for therapeutic treatment of Expressive Behaviour as per MD Order. Monitor effectiveness and for side effects.  Date Initiated: 12/06/2024  Created on: 12/06/2024  Created by: Ksenia Tchipilko (RPN)  Revision on: 12/06/2024  Revision by: Ksenia Tchipilko (RPN)</p> <p>• BSO RECOMMENDATIONS:</p> <ol style="list-style-type: none"> <li>1. When Nader is sleeping, allow him to wake on his own before approaching. If it's late in the morning, may try gently rubbing his hand while trying to wake him up but if Nader is sound asleep to re- approach later.</li> <li>2. Ensure team members are waving, smiling and speak in a slow, soft tone prior to care.</li> <li>3. Nader requires two person assistance for all care. Ensure only one team member is speaking and explain each step. Allow Nader time to process in what you are asking him to do.</li> <li>4. Due to language barrier, actions and gestures can be utilized if wife is not visiting to translate.</li> <li>5. Too many people may escalate expressions and Nader may become agitated. He responds better to less stimulation. Avoid crowding Nader, utilize Stop and Go approach. Re-approaching as necessary.</li> <li>6. If agitation is presenting, look for facial signs of pain/discomfort and check if Nader is due for a bowel movement. Report to the team leader if Nader shows symptoms of constipation.</li> <li>7. Report all expressive behaviours to the team leader.</li> </ol>	Registered Practical Nurse RN

			<p>Revision by: Ksenia Tchpilko (RPN)</p> <p>• TRIGGERS leading to RESISTANCE to Care Needs of refusing to change clothing, refusing to use the washroom, refusing medication, etc. as expression of behaviour include poor judgement.</p> <p>Date Initiated: 11/26/2025 Created on: 11/26/2025 Created by: Ksenia Tchpilko (RPN) Revision on: 11/26/2025 Revision by: Ksenia Tchpilko (RPN)</p> <p>• RESISTANCE to Care Need: If Lisa is declining to change clothes, use washroom, take medications, etc. re-approach in 15-30 minutes. Report episode to Registered Staff.</p> <p>Date Initiated: 11/26/2025 Created on: 11/26/2025 Created by: Ksenia Tchpilko (RPN) Revision on: 11/26/2025 Revision by: Ksenia Tchpilko (RPN)</p> <p>• BSO RECOMMENDATIONS:</p> <p>1. Encourage Lisa to use the washroom during the specific times that are outlined in the toileting plan.</p> <p>2. The following are the strategies that might help you with encouraging her without directly saying it to her:</p> <p>- Pointing towards the washroom</p> <p>- Standing near it and pausing</p> <p>- Opening the door and turing on the light</p> <p>3. Give Lisa a choice, it reduces resistance to care. For example, "Would you like to stop in the bathroom before or after we start?"</p> <p>4. When Lisa refuses care, use a STOP and GO approach, reapproaching in 15-30 minutes later.</p>				PCA Registered Practical Nurse

Staff use activities that are meaningful to Lisa such as cleaning a princess figurine, looking at a princess poster, fixing her hair with a princess bow, or using princess lotion to help her transition into the bathroom. These items are kept in or near the bathroom.						
			6. When toileting is needed, staff first invite Lisa to engage in one of these preferred activities. Once she is in the bathroom, staff engage her for about 30 seconds and then gently prompt toileting.						
			7. Report all expressive behaviours to the team leader. Date Initiated: 11/26/2025 Created on: 11/26/2025 Created by: Ksenia Tchipilko (RPN) Revision on: 11/29/2025 Revision by: Ksenia Tchipilko (RPN)
