mar and chart reviewed

seen alone

following for psychosocial visits

talked about art again today

pt mood very bright

remembered our last conversation

said she had asked Mary to bring in pieces, but only has some in her closet

has a small portfolio

she hasn't looked at it in ages herself, curious what it shows

we look through it together, artwork done by another artist

tells me the story of that

tells me about her classes that she took with her friend, completing a painting per class

more stories of the paintings she's sold in the past

I share with Ms. Attard some paintings that i've done, that I have signed up for art classes too now

very engaged, interested, bright

supportive listening, enjoys talking about art

has excellent memory, telling me detailed stories about several of her paintings

will cont to follow intermittently

Effective Date: 10/13/2025 22:33 Type: Behaviour - Follow up

**Note Text :** The resident is on isolation due to COVID 19 positive, supper serviced at the bedside, she took her food/fluid inside her room by her own, Writer noted that the resident walked out of her room after her supper inside her room, she stated that she called police, and the police said the facility has no right to keep her inside her room. She went downstairs for a while, returned to her room after maybe half an hour, She refused to take antibiotics. Writer explained the medication name and purpose, she still refused, PSW approached her for HS care, she was easily to get upset. staff managed to wash and to change her, now she is sitting on a sofa at the bedside, calm and quiet, no further behavior noted, will keep monitoring.

Author:Xiao Song Zhou RESP - Nursing - Registered Practical Nurse

Signature: \_\_\_\_\_

Effective Date: 10/13/2025 13:53 Type: Behaviour - Follow up

**Note Text :** Resident easily got upset and irritated with everything that the staff was doing for her, by assisting her with care and even when the writer was giving her medications. She won't listen to any explanation and accused that staff are all incompetent. Unable to redirect behaviour. Settled in the room at present.

**Note Text :** Palliative care follow up

85F CHF, COPD

Mar and chart reviewed

seen alone

followed for psychosocial support

similar conversation as last visit

frustrated that she is less independent, relies on others

when having a bM, will not be changed right away, which she understands is impossible, but finds it very frustrating and uncomfortable to have the stool sit and burn her sensitive skin

feeling sadly about this in general

finds it helpful to debrief/talk it out, then thinks about how things could be worst, has been through a lot in her life

answering at her baseline

no resp distress

supportive listening

Need to call daughter and son to touch base at some point in the next few weeks as pt has mentioned their stressors

LATE ENTRY

**Note Text :** After lunch, around 13:45 resident was verbalizing she wants to go outdoors to staff. Program staff took her outside for fresh air, program staff voiced she appeared agitated once outside wanting to go back to her home. The resident started escalating and attempting to leave the LTC property on her own. Program therapist and her student followed promptly and did not leave her unattended. Program therapist attempted redirection multiple times, however resident continued to be agitated and restless, therefore, program therapist called O'Neill center for assistance. Staff (physiotherapist) from our facility was able to redirect her back to the facility. Currently, resident is accompanied by resident care manager in the basement.

Family Attending: wife Josephine

Care Team:

Physiotherapy: Afshin

Nutrition: Ping

Programs: Anna

Rehab Coordinator: Rodalyn

Nurse: Grace

Reviewed diagnoses and medications as follows:

Meds:

- Acetaminophen ES,1000 mg, PO QID, pain
- Aspirin (ASA), 81 mg, PO daily, stroke
- Bisacodyl Supp, 10 mg, rectal PRN, constipation
- Cholecalciferol, 1000 units, PO daily, bone health
- Fluticasone/Vilanterol/Umeclidinium, 100/25/62.5 mcg, inhale daily, COPD
- Hydromorphone, 1 mg, PO BID PRN, pain (pre-dressing change)
- Multivitamin, PO daily, supplement
- Pantoprazole, 40 mg, PO daily, GERD (do not crush)
- Salbutamol, 100 mcg/dose, inhale 2 puffs Q4H PRN, SOB/wheezing
- Simvastatin, 20 mg, PO bedtime daily, hyperlipidemia
- Sennosides, 8.6 mg x2, PO BID, constipation

Issues:

1. Recent hospitalization for dehydration and management of his venous leg ulcers.
2. Has been stable since return from hospital about 6 days ago.
3. Reviewed vaccinations such as pneumococcal (Prevnar 20), covid-19 boosters, Tdap, annual influenza immunization as well as vaccinations that may not be covered by the government plan (Shingrix). Not interested in shingrix.
4. Advanced directives reviewed and "Do Not Resuscitate" order reconfirmed.

**Note Text :** Care Conference.

Family Attending: grandson unfortunately did not attend.

Will discuss the following at the conference when rescheduled.

Issues:

1. Recommend switching her current SSRI to duloxetine to help with her arthritic knee pain.
2. Recommend palliative care consult with our palliative care physician given her breast-cancer.
3. Review vaccinations such as RSV, pneumococcal (Pneu23, Prevnar 20), Tdap, covid-19 boosters, annual influenza immunization as well as vaccination that may not covered by the government plan (Shingrix). Risks and benefits of vaccinations in general including local reactions, 1-2 days of fever, malaise, headache, myalgias or other very rare adverse events in the hundreds of thousands.

10:30-11:00

Care Conference.

Family Attending:

Care Team:

Physiotherapy: Afshin

Nutrition: Ping

Programs: Joy

Rehab Coordinator: Rodalyn

Nurse Practitioner: Sheila

**Note Text :** Resident was closely monitored during the shift. Resident layed in bed awake but was quiet, he was noted to fall asleep around 0500 hrs. No voiced concerns. Will continue to monitor.

Author:Kimberly Martinez RESP - Nursing - Registered Practical Nurse

Signature: \_\_\_\_\_

Effective Date: 10/11/2025 22:02 Type: Behaviour - Follow up

**Note Text :** Resident was received resting in bed. Later, the resident became verbally agitated and began yelling at staff/writer without identifiable cause or concern. Writer approached and engaged with the resident, who stated a desire to go outside to meet his wife and to buy food for staff. Resident further stated that if not permitted, he would leave the building without notifying anyone.

Writer provided redirection and reassurance; however, the resident remained agitated and continued attempting to go downstairs multiple times during the shift. The resident was observed wandering in the hallway throughout the shift.

After supper, while in the dining hall, staff attempted to assist and escort the resident by holding the wheelchair, offering help with mobility. The resident was frequently observed ambulating without the walker despite repeated reminders to use it. Resident verbalized that he felt comfortable walking without it.

Resident consumed meals and fluids well. Retired to bed at approximately 9:30PM and is currently resting in bed.

LATE ENTRY

**Note Text :** At about 0145 hrs res was yelling loudly at PSW when she changed his brief. Writer went to explain to res that he is too loud and the roommate cannot sleep. Res began swearing and yelling loudly at writer saying " you get out, no one here is giving me good food and care for me, this is why I am going to the hospital so often. Writer tried to calm res but he became louder. Refused PRN meds. Lying in bed and awake at this time.

Author:Chandrakala Ameerally RESP - Nursing - Registered Practical Nurse Signature: \_\_\_\_\_

Effective Date: 10/03/2025 20:38 Type: Behaviour - Follow up

**Note Text :** Resident is monitored for responsive behavior.Resident was upset,talkative and talking loud to the staff before and after supper, prn med was given.Ate well at supper.Resident went outside in the garden with the 1-1 sitter.He came back to the floor at 1900hrs.Meds taken and cooperative at HS care.Settled and sleeping in bed.Will monitor.

Author:Clarita Rebancos RESP - Nursing - Registered Nurse Signature: \_\_\_\_\_

Effective Date: 10/03/2025 14:56 Type: Behaviour - Follow up

**Note Text :** The resident was monitored by a 1:1 sitter throughout the shift. During the shift, the resident was observed ambulating in the hallway by using his walker at the starting of the shift and proceeded to the basement a few times, accompanied by the sitter. The resident verbalized that he was feeling weak so transfer W/C was provided,remained seated in his W/C throughout the shift.Resident's \$20 was handed to residents at 1048 hrs upon the resident's request.The resident was reminded to keep it safe.Resident's returned back his \$20 to the writer after lunch,and was kept in the narcotic bin for safe keeping.No other concerns were voiced/noted.

Author:Tara Basnet RESP - Nursing - Registered Nurse Signature: \_\_\_\_\_

Effective Date: 10/03/2025 06:34 Type: Behaviour - Follow up

**Note Text :** Resident is monitored for responsive behaviours. He had a 1:1 sitter. Resident was talkative during the night, he spoke about

Response :

Author: Kimberly Martinez RESP - Nursing - Registered Practical Nurse

Signature: \_\_\_\_\_

Effective Date: 10/02/2025 21:36 Type: Behaviour - Follow up

Note Text : Resident was monitored by a 1:1 sitter throughout the shift for safety. During the shift, the resident was observed ambulating in the hallway multiple times and proceeded to the basement 3 to 4 occasions, accompanied by the sitter.

The resident repeatedly expressed a desire to bring food from outside for all staff on the unit. Despite redirection efforts by both the writer and other staff members, the resident continued to make the same request after short intervals. The resident appeared agitated during these interactions.

The writer received a phone call from the evening manager, who reported that \$20 had been withdrawn from the resident's account and provided to the resident upon his request. Later in the shift, the sitter returned the \$20 to the writer after the resident had gone to bed, stating to keep it safe and return it in the morning should the resident ask for it again.

The \$20 has been secured in the medication cart and will be endorsed to the incoming staff during shift handover.

90F parkinson's

mar and chart reviewed

following for comfort check

seen alone in the living area then spoke w daughter Jennifer by phone

no concerns or changes, has been similar

no delirium noted

appears comfortable and fairly stable since I first met her in May

Jennifer feels the same way

very happy that she spoke a bit last month w me

stated that during their weekly visits she does not speak at all

sitting in her wheelchair

appears calm no distress

not speaking or looking at me today but holding my hand everytime I stand up to move away

spent some time holding hands and looking out the window, watching TV

update provided

Jennifer very grateful for care by all, especially the church related visits

would like as much psychosocial support as possible

I will cont to follow intermittently

**Note Text :** Dr Radu Butan provided consult

Oct 06, 2025 7:56 PM

Thanks for the consult.

I think you bring some genuine concerns about using GLP-1 in this patient and I agree with you I would probably avoid Ozempic, given higher risk of aspiration, and in addition GLP-1 have been associated with higher risk of gallstones.

From the renal perspective you already have her on RAS blockade which is excellent.

I think in terms of renal perspective I would recommend adding SGLT-2, either Empagliflozin 10 mg daily or Dapagliflozin 10 mg daily. I guess the only concern is limited data for using SGLT-2 with G-tubes, but mechanistically can't think of any concerns.

Other then that, I think rest of medications seem appropriate, and I agree with reducing dose of Tenofovir.

From a renal perspective would monitor Serum Creatinine, electrolytes, urine ACR on a 6 month basis.

Dr. Radu Butan

Diagnoses :	Type 2 diabetes mellitus without (mention of) complications(E11.9), Dysphasia and aphasia(R47.0), Stroke, not specified as haemorrhage or infarction(I64), Hemiplegia of unspecified type of dominant side(G81.90), Benign hypertension(I10.0), Severe depressive episode without psychotic symptoms(F32.2), Sickle-cell trait(D57.3), Occlusion and stenosis of carotid artery(I65.2), Acute hepatitis B without delta-agent and without hepatic coma(B16.9)				

Provincial Nephrology Group automatically assigned case to Dr. Radu Butan

Dr Alison Hall submitted new case

Sep 30, 2025 2:52 PM

Dear colleague,

This 77 year old female with aphasia and a G-tube due to recurrent strokes, resides at the O'Neill Centre long term care facility. She has a history of type II Diabetes and CKD. Due to declining renal function I have maintained fairly tight glycemic control. Her eGFR continues to decline, so I explored the possibility of adding semaglutide. The following issues give me pause however:

1. G-tube feeds and the delayed gastric emptying as a risk for aspiration
2. A history of hiatus hernia, also increasing aspiration risk
3. A history of pancreatitis requiring ICU admission

I decreased her Tenofovir for her Hepatitis B to 150mg per day.

Kindly advise what further steps might safely be taken to optimize/protect renal function without significant risk. Is semaglutide still an option?

Many thanks for your kind recommendations.

Results:

- 09/19/2025 HbA1c 6.0;  
CBC hemoglobin 112, RBC 4.1, MCV 83, WBC 4.7, platelets 192;  
INR 2.9.  
- 07/27/2025 urine ACR 31.8.  
- 06/25/2025 creatinine 122, eGFR 39.

Medical history:

1. History of strokes on coumadin, switched to Apixaban but stroke on Apixaban – recommend stay on Coumadin
2. Dysphasia, dysphagia, right hemiplegia post strokes
3. Chronic hepatitis B on tenofovir since Feb 2021
4. Diabetes Mellitus
5. Hypertension
6. Dyslipidemia
7. Decreased mood (on Mirtazapine 15mg HS)
8. Cholecystitis dx emerg Jan 9, 2021 treated with oral antibiotic
9. Kidney stones incidental findings on u/s Oct 2018
10. Hospitalization Jan 16 to Feb 12, 2021 with hypernatremia, hyperglycemia, elevated liver enzymes felt to be chronic hepatitis B
11. Hospitalization March 28 to June 15, 2022 with gallstone pancreatitis into ICU rx TPN, ERCP stone removal & sphincterotomy, Hb<70 transfused OGD duodenitis and type 1 hiatal hernia repair noted, AKI Cr 525 with IHD.
12. CKD
13. Recurrent upper UTI secondary to stones and nephroureterostomy tube 2023-2024

95F dementia

mar and chart reviewed

following up as last ivist there was a concern for mumbling more, possibly decline

pt seems very bright today

listening to music, laughing at dances

saying some basic phrases in portuguese, "I'm well", "bye", otherwise, similar to prev, responds in full sentences I do not understand when she speaks with google translate

attempted to call all three numbers of her family to see if they feel sheh as changed

no answer

pt seems comfortable, smiling, speaking in full sentences

seems to be fairly stable, will cont to follow up intermittently

mar and chart reviewed

comfort check

no nursing concerns, has been the same

sleeping most of the time but does ask for things, drinks juice, no worsening wounds

I called her friend and POA Vivi who is recently back from her many months long trip back home

came to visit Laurinda, who had asked for catfish

she is also amazed that pt looks the same as when she was last here

glad she's comfortable as well

sleeping comfortably, no reaction to my voice or light touch

hands cold

has remained stable PPS 20%

support to friend

will cont to check in intermittently

68F ALS

mar and chart reviewed

seen alone first

doing well, happy to see me, stated she was thinking about when I would visit just earlier this week

had a nice shower

feeling fresh

enjoying PT sessions, finds the shoulder exercises helpful

still main issue is weakness causing fatigue, lying down is helpful

no changes noted

no nursing concerns

no swallowing issues or new symptoms per pt

enjoying the nice weather

today allowed me to call her brother, gave me 2 phone numbers: 905-654-3060 and 647-272-6240 for him. Provided consent to talk to him about any health issues

spoke w brother Olsen and sister in law by phone

both back from St Vincent recently

stated they are well aware of what's been going on

they know she doesn't believe in her diagnosis of ALS

stated the approach has been scary for her so far, they think something more gentle is better

we discussed my role here, supporting MRP and rest of teh team, goal is to build rapport, discuss ALS and disease progression, GOC they are happy with this

shared that she is very anxious about talking about resuscitation, worried it means she will die soon

they try to tell her that this is just regular protocol for planning, but she has sent them paranoid voice messages, etc

they were just in St. Vincent

pt's daughter is in "an institution", not able to make any decisions

pt's son is also in St. Vincent, deferred all decision making to family in Canada

pt had told me that she is debating still between cousin Vera and brother Olsen to be SDM

smiling, lying in bed, answering appropriately

- opening up more, consent provided to talk to brother about anything

- they will come in for a visit, see how her function is compared to last time they came beforetheir vacation

- will follow up and call them again when I return in 2 weeks

- GOC: reviewed still presumed full code, we discussed different ranges last time, what it means. POA is pending for cousin vs brother

68F ALS

mar and chart reviewed

seen alone

following to build rapport then ultimately to discuss her ALS related GOC and future disease progression info

remembers me more clearly this time

finds the days are passing quickly

does her exercises, calls her kids daily

brother is coming back from St Vincent today, on his flight

enjoying the nice weather

transitioned the conversation to her diagnosis adjacent topics a few times

ie. asked her if her family also thought that she didn't have ad iagnosis of ALS

pt would say a sentence or two, then stop herself, say it's too sad, it was like living a nightmare

some progress, she said that she has been thinking about SDM more, would likely ask her brother to be her SDM who is local

is ok for me to call him next time, will give me his number next time

had also been accepting of tylenol from nursing staff and had found it effective

answering appropriately, no distress

smiling for the most part

slowly opening up

will cont to discuss SDM next visit, will hopefully touch base with her brother

++ Supportive listening and talking about her childhood, interests, fall weather, housing market, price of goods, dream home of hers, etc

instead

connecting ontario notes reviewed

went for melena

both times self resolved, did not get scope, started on panto

now BID

and after second visit stopped ASA

had transfusions twice

nursing staff note he is more tired, sleepy, fed for meals

pt himself does not understand the reason he was admitted

found the hospital visitsto be unpleasant experiences, doesn't want to go back

feeling more tired, having nausea, some abdo discomfort, and neck pain that is chronic

we discussed his diagnosis, what was done in hospital

we discussed in Mandarin that he can stay in the LTC setting and not return to hospital, but investigation and management here is very limited, and if he has further bleed or other issue, possibility of earlier mortality

at first he stated he wished to return to the hospital after all, but was because heh ad pain

after we discussed that we can treat symptoms here, he stated he is ok with the higher risk for earlier death, would not want to return to hospital

we reiterated the pros and cons, confirmed his decision several times to ensure understanding

I then called Vicky PGT to update, she is in agreement

pt answering at his baseline with me

likely more responsive in Mandarin in general

abdo soft, slightly tender

- GOC: order written to change to DNR, no hospital transfer. Yes cont investigations in the home. Updated PGT

- pain: pt finds it difficult to advocate for himself. Start HM 0.2mg SC BID to trial. ALready had PRN but was not asking

- nausea: similarly, already had metoclopramide PRN, start 5mg SC TID 30mins before meals

Will follow up

1. Recent occasional cough and some eye discharge. Will monitor for now.

2. Her Blood pressures have been stable.

3. Reviewed vaccinations such as RSV, pneumococcal (Prevnar 20), covid-19 boosters, annual influenza immunization. They could also consider shingrix. She last had a Tdap in 2023. She has declined vaccines since. Risks and benefits of vaccinations in general including local reactions, 1-2 days of fever, malaise, headache, myalgias or the risk of other very rare adverse events in the hundreds of thousands.

4. Advanced directives reviewed and "Do Not Resuscitate" order reconfirmed. They will let us know if they are still ok with hospital transfers.

LATE ENTRY

Note Text : Resident reported missing around 14:05.

Code yellow was announced at 14:10. Staff searched the exits and different neighborhoods. Resident was found on third floor Willowvale in her room at around 14:15. Resident was guided back to the basement because of the ongoing fogging happening on the neighborhood. Vitals were assessed and are as follows: BP: 142/75 HR:105 SpO2: 96% TEMP:36.6 RR:18. Resident is comfortable and denied any respiratory discomfort. No apparent distressed was noted.
