Effective Date: 12/04/2025 02:09 Type: Behavior note

Behavior Identified : Resident requesting pleasuring perineal rubs from Aide(s) after administration of Clotrimazole Vaginal Cream. First - "that hurt" - then it itches - then could you scratch and rub the area - it feels nice.

Describe Interventions Used (Medicinal & Non-Medicinal) : Clotrimazole Vaginal Cream seemed to start unacceptable feelings in resident. Asked Aides to double up for remainder of shift with her. Not sure why this reaction happened - havent seen any other reactions like this to the admin of this particular cream.

Intervention Effective :

For the moment - she eventually stopped pressing the call light

Effective Date: 12/04/2025 00:17 Type: Behavior note

Behavior Identified : inappropriate touching of Aides

Describe Interventions Used (Medicinal & Non-Medicinal) : Re-directing resident attention, discuss inappropriate actions. Inform Aids to double up when doing care

Intervention Effective : End of evening - resident resting ATT with eyes closed. Having 2 provide care has helped.
